Forty-eight stills, at their real export sizes.

Every artefact in this document ships as a PNG in `exports/png/`, named `id-name-WIDTHxHEIGHT.png`. Screen recordings are not in this set — they have to come off a real device.

What is not in this set

SCREEN RECORDINGS

The twelve Tier 0 captures — The Ten, The Reveal, Today, the occasion end to end, packing, borrow, stylist. These have to be recorded on a real device with a real closet: 1080×1920, 60fps, clean status bar. Everything above is composed to sit around them.

APP PREVIEWS

Three 15–30s videos, on-device capture only. No hands, no people, no over-the-shoulder angle — Apple rejects those.

M2 AND M3 REGENERATIONS

The voice-led and occasion-led screenshot sets. Nothing in this handover shows voice intake; it has not shipped.

LOGO SVG SOURCE

The wordmark and icon are set in Instrument Serif here, not outlined. Vector source has to be drawn from the type before it can go in a press kit.
